

GET TO KNOW...

YOUR ANTARCTIC PENGUINS!

8

There are *eight different species of penguin* living on or near Antarctica today.

LIFE CYCLE

The life expectancy of a penguin is up to 20 years.

Penguins living in Antarctica

14,000,000

Humans living in Antarctica - 0

INCUBATION PERIOD

Depending on the species, incubation lengths range from 30 - 40 days for *Adélies* to 65 days for *emperors*.

LARGEST PENGUIN

Emperors are the largest penguin breed, and only species to breed during the Antarctic winter.

ROOKERY

A penguin nest is made up of rocks, and called a 'rookery'.

GETTING AROUND

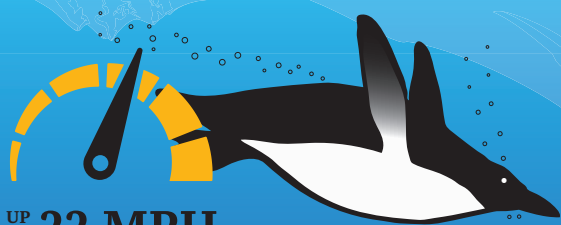

Penguins prefer sliding - or '*tobogganing*' - on their bellies as an efficient way to travel.

ON THE MENU

Penguins are fond of squid, fish and crustaceans, such as krill.

UP TO 22 MPH

Most penguins swim underwater at up to *seven miles per hour* (mph), but the fastest penguin, the *gentoo*, can reach top speeds of 22 mph!

CAN HOLD THEIR BREATH
UP TO 20 MINS
UNDERWATER

PENGUINS ♥ KRILL

Penguins eat an average of 800 grams of krill per day.
